

About Metalphoto[®]:

For over 50 years, industrial and military engineers have specified Metalphoto[®] photosensitive anodized aluminum in applications where permanent product identification is critical. Metalphoto's durability comes from its photographic image which is sealed *inside* of the anodized aluminum, providing resistance to corrosion, sunlight degradation, abrasion, extreme temperatures and chemical exposure.

Available from 0.003" to 0.125" thick, Metalphoto can be used for a wide variety of applications where permanent identification is critical including barcode labels, nameplates/rating plates, maintenance schematics, machine control panels and signage.

About Stanley Manufacturing:

Since its inception in 1917, Stanley Mfg. Company has evolved from a metal printer and fabricator to a diversified graphic communications firm supplying manufacturers, wholesalers and agencies with specialty graphics printed on plastics, metals, composites and traditional paper stocks.

In the old days, Stanley Mfg. was the 'go to' company for printed metals. They supplied automotive, aircraft makers and governments with nameplates, decorative trim, metal gauges (military) and aircraft components such as control panels, and spun metal nose cones and trim for companies like Avro Aviation.

Stanley Mfg. supplies a huge array of products from its Toronto and Montreal facilities with over 40,000 combined square feet of manufacturing space. Its industrial products division also supplies automotive, mining, aerospace, and industrial manufacturers. The specialty graphics division supplies advertising agencies, retail suppliers, distributors, and engineering firms with display graphics, architectural steel and brass products and a variety of Point of Sale graphics and merchandise. This makes Stanley Mfg. one of Canada's most diverse printing companies.

The company is ISO 9001:2008 approved and Controlled Goods Registered. Its quality systems are recognized and approved by aerospace and industrial manufacturers.

The Stanley mission is simple: Provide high quality products at a competitive price, on time and on budget.
